## FORT HEALTH FREE WEBINARS

**"We believe the more we care the better we will do."**

"Fort Health is an independent non-profit dedicated to transforming the lives of children and families struggling with mental health and learning disorders." Fort Health provides free mental health webinars. Here a few:

**May 31: 2:30pm(PST) Why Are Many Kids Anxious and How Can Parents Help?** Anxiety affected more than 1-in-10 children and adolescents. As parents, caregivers, and educators; we can be a part of the problem. But we are also the biggest part of the solution. This webinar will teach you how to support children and adolescents in an age of anxiety. Featuring some of the nation's leading mental health and anxiety experts, this session is filled with practical skills as well as a live parent Q&A. **A recording of the session will be sent within 2 days to everyone who registered. To register, visit: [FortHealthWhyAreManyKidsAnxious](http://FortHealthWhyAreManyKidsAnxious)**

**Supportive Parenting for LGBTQ+ Youth** The mental health crisis is especially severe for LGBTQ+ youth. 7 in 10 report symptoms of anxiety and 6 in 10 report symptoms of depression. The key takeaway: being LGBTQ+ does not inherently cause mental health challenges. Mistreatment, violence, discrimination, and bigotry toward them are the causes of many of these challenges.

**Effective Strategies for Managing Inattention & Impulsivity In The Classroom** n-person learning has been especially hard for students with inattention & impulsivity challenges. These kids require more support and make it harder to create a learning environment in the classroom. Fort Health's clinical leadership held an education session with teachers and staff from New Jersey schools

## Family Acceptance Project® proves

### Family Support Saves Lives!

#### Family Behaviors that Increase Your LGBTQ Child's Health & Well-Being

Research from the Family Acceptance Project® found more than 50 family accepting behaviors that help protect your lesbian, gay, bisexual, transgender and queer-identified (LGBTQ) child against health risks like depression, suicide and illegal drug use and help to increase your LGBTQ child's self-esteem, health and well-being. A little change makes a difference in decreasing your child's isolation and risk and giving them hope that their family will be there for them.

Family support saves lives!

#### BEHAVIORS THAT HELP...

Tell your LGBTQ / gender diverse child that you love them	Support your child's gender expression	Talk with your child or foster child about their LGBTQ identity and listen respectfully – even when you feel uncomfortable or think that being gay or transgender is wrong	Require other family members to treat your child with respect	Show affection when your child tells you or when you learn that your child is LGBTQ
Ask your child if – and how – you can help them tell other people about their LGBTQ identity	Welcome your child's LGBTQ friends to your home	Participate in family support groups and activities for families with LGBTQ and gender diverse children to get support for yourself and your family and guidance for supporting your LGBTQ child	Use your child's chosen name and the pronoun that matches their gender identity	Bring your child to LGBTQ groups and events
Find a congregation that welcomes your LGBTQ / gender diverse child and family	Participate in family support groups and activities for families with LGBTQ and gender diverse children to get support for yourself and your family and guidance for supporting your LGBTQ child	Talk with your religious leaders to help your congregation become supportive of LGBTQ people	Tell your LGBTQ / gender diverse child that you're proud of them	Get accurate information to educate yourself about your child's sexual orientation, gender identity and expression
Tell your LGBTQ / gender diverse child that you will be there for them – even if you don't fully understand	Welcome your child's LGBTQ partner to family events and activities	Express enthusiasm for your child having an LGBTQ / gender diverse partner when they're ready to date	Stand up for your child when others mistreat them because of their LGBTQ identity or gender expression – at home, at school, in your congregation and in the community	Speak openly about your child's LGBTQ identity
Connect your child with LGBTQ adult role models				Believe that your child can be a happy LGBTQ adult – and tell them they will have a good life

The more of these behaviors that parents and families do, the better your LGBTQ child's health & well-being
