

LEARNING CHALLENGES & SCHOOL ADVOCACY: A 2-PART SERIES

Facilitated by:
Interior Community Services
Support to Family Care Network Program

Did you know that 10 -17 % of children aged 4-14 have a neurodevelopmental disability? Neurodiverse children and youth experience the world significantly differently than others and thus, the traditional parenting and teaching approaches **do not** work for these kiddos.

PART 1 - WEDNESDAY, OCTOBER 21

In part 1 of this workshop, we will take a brief look at some of the common challenges and learning differences some children / youth experience, including ADHD, autism, FASD, Specific Learning Challenges such as Dyslexia, and more - and how these can affect the way a child / youth learns. We will look at some tips to help you support and teach your child. We end with a Q&A, along with resources.

PART 2 - WEDNESDAY, OCTOBER 28

In Part 2 of this workshop, we will continue to look at tips to help you support and teach your child. The main portion of part 2 will focus on ways to advocate for better supports at school for your child / youth. Again, we will end with a Q&A and, of course, we will leave you with resources!

WEDNESDAYS
OCT 21 (Part 1)
& OCT 28 (Part 2)
6:30pm –
8:30pm
(PST)

Please note: This workshop is geared towards Out of Care / Kinship Caregivers and new Foster Caregivers and new Contracted Agency Caregivers

This training is open to Out of Care / Kinship Caregivers, Foster Caregivers and Contracted Agency Caregivers.

Please join us for both sessions or just one. Either way, you will receive access to the resources for both sessions!
