SUPPORT TO FAMILY CARE NETWORK PROGRAM
WITH INTERIOR COMMUNITY SERVICES

We know that placing children with family is the best option. Yet, often children have complex and concurrent diagnoses. Stress levels for caregivers can be high especially for those who are navigating unfamiliar systems. This drop-in provides an opportunity for caregivers to receive support, mentor others, socialize, share challenges, celebrate successes and access education and information. This drop-in is facilitated by trained Network Facilitators who are bound by confidentiality and will only share information with the expressed permission of caregivers. Information shared with Facilitators is held in confidence unless there is a safety concern.
